Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity globally.

The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are accelerating ahead ...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

As global demand for renewable energy surges, battery and energy storage projects worth over \$10 billion are reshaping how we generate, store, and distribute electricity. This article explores key ...

Close to half of all battery storage projects are paired with solar or wind energy projects as part of their

10 billion battery and energy storage projects

symbiotic relationship.
