The 120KW fast DC charging pile double port mainly consists of a human-computer interaction unit, a control unit, a metering unit, and a safety protection unit.

The product integrates the charging cabinet, charging interface, human-computer interaction interface, communication, and metering into a whole. The cabinet adopts waterproof, dustproof, and heat ...

PENODA 120kW Rapid Charging Dc Fast Charger Split Cabinet Floor Stand Commercial Ev Charger Station Charging Pile

120 120kW 250 Amps ISO 15118 Features Scalable: PowerPump's DC fast charging stations feature a modular design with a scalable capability, enabling straightforward configuration of charging .

With the concept of modular design, it can be flexibly configured into 60kW, 80kW, 100kW 120kW,160kW and other power outputs to meet the requirements of charging EVs with different ...

The Open Charge Point Protocol (OCPP) is an open-source communication protocol for networked electric vehicle chargers. The vision of OCPP is to make any EV Chargers work with any charger ...

With a maximum output power of 120kW, it offers high charging efficiency and reduces charging wait times. It supports a wide voltage range of 200V to 1000V, making it compatible with various electric ...

Up to now, the 120KW DC integrated charging piles supplied by ZhonHen to BP has served a total of about 30 stations in Guangzhou, Shanghai, Hangzhou and other cities, with a total installed power of ...

Fully compliant with mandatory protection standards for terminal circuits in charging applications, the XL-21 ensures maximum safety and reliability. Tailored for optimal performance, it's the ideal choice for ...

120kW Communication Cabinet for Charging Piles

Level 3 Fast Charger, 120kW FEATURES Floor-standing DC charging piles are mainly used for DC fast charging of electric vehicles. It is a charging pile that integrates the functions of charging control and ...
