Why do you need an outdoor electrical server cabinet enclosure?

Generally, you need an outdoor electrical server cabinet enclosure to protect the electrical components from the environment. The enclosures, as the name suggests, enclose electrical or electronic equipment thus preventing users from electrical risks like shock, etc. That is the general perspective on why you need a free-standing server enclosure.

Discover AZE Telecom's outdoor weatherproof cabinets and waterproof server racks. Designed to protect electronics, servers, and network equipment in harsh environments. Durable, secure, and customizable--find the perfect solution for your outdoor telecom needs today! Protect Your Electronics with AZE Telecom's Outdoor Weatherproof Cabinets

What is an outdoor floor standing server cabinet enclosure?

AZE's outdoor floor standing server cabinet enclosures are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. They have a rain hood and water and dust proof polyurethane door joint strip features, all fixtures are internal to the cabinet to provide a secure solution.

What are the different types of server electrical enclosures?

They come in two main structural designs: Single door and double door designs. Single door enclosures come with a single access door, however, for the double door free-standing outdoor server electrical enclosure is one that is built with two access doors. This one's more common in larger enclosures mostly for industrial use.
