Driven by the order boom, domestic energy storage companies generally reached full production capacity, with leading players facing severe capacity constraints and a renewed "cell shortage"...

Plus Power has raised \$1.8 billion to construct battery energy storage system (BESS) facilities in Arizona's Salt River Project and the ERCOT market in Texas.

A strong U.S. solar and storage manufacturing base can reduce supply chain uncertainty, drive clean energy deployment, and strengthen America's energy security.

The Department of Energy Loans Programs Office has approved a loan to Arizona Public Service (APS) to construct new electricity generation, storage and transmission assets.

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

In a move to become the "European leader" in energy storage, EDF, the state-owned utility of France, said it plans to spend 8 billion euros (\$9.8 billion) to build 10,000 MW ...

Plus Power has completed US\$1.8 billion financing for its battery storage pipeline, including the largest for a standalone project to-date.

It is reported that this energy storage system supply agreement will last from 2026 to 2029, with a total order volume of 8GWh, mainly providing large-capacity LFP battery container energy storage systems.

In the current "zero-sum game" phase of the new energy industry, standalone photovoltaic (PV) module manufacturing or power station development can no longer sustain high premiums. Consequently, ...
