-----  
How many Aiko bifacial double-glass modules are there?

o Setup: 12 AIKO ABC bifacial double-glass modules (630W each) and 14 TOPCon modules (590W each) installed on the roof of the Ningxia Electric Power Design Institute Co.,Ltd. Both types of modules were fixed at the same angle and partially shaded at certain times of the day.

Why should you choose Aiko's ABC modules?

o Performance: ABC modules achieved a 2,6% higher power generation per kilowatt. As more data from worldwide test sites becomes available, AIKO's ABC modules consistently demonstrate superior power output compared to market counterparts.

When did Aiko start producing ABC cells?

In 2021, Aiko introduced its first ABC (All-Back Contact) cell with no front grid lines, marking the dawn of a new era in monocrystalline silicon technology. By 2023, AIKO Zhuhai had launched a 10GW ABC cell and module production line, heralding the industry's true entry into large-scale manufacturing of n-type BC technology.

What is the difference between Topcon & ABC?

The ABC module is naturally designed for high efficiency, boasting 6%-10% more power output compared to TOPCon for the same area. With superior partial shading optimization, better temperature coefficients, and lower degradation rates, ABC's cutting-edge technology ensures higher energy yield per watt.

o Setup: Comparing ABC double-glass 635W modules with TOPCon double-glass 570W modules under full sun and shaded conditions. o Performance: Under full sun, ABC modules achieved a 1,95% higher ...

At the recently concluded SNEC 2024 in China, AIKO Solar, the pioneer in back-contact technology, showcased its latest product offerings for residential and commercial & industrial (C& I) ...

The glass-glass modules from Aiko Solar combine high-performance N-Type ABC cell technology with a robust double-glass construction. The result: extremely durable modules with efficiencies of up to 24.4 %, minimal ...

Now, Chinese manufacturer Aiko Solar has announced a breakthrough for its ABC (All Back Contact)

## ABC double-glass modules

modules. According to the announcement, the ABC module in the "Stellar" series is the world's ...

Maximizing the installation capacity, Partial shading optimization Lower O& M cost High temperature restriction and micro-crack resistance, front grid free, ensuring roof safety, reducing module failure rate.

The Stellar ABC series is the only copper-interconnected, double-glass module qualified for floating PV installations. AIKO said that these modules have shown significantly lower power loss than ...

Aiko Dual-Glass Module 675W 680W 690W 695W 670W N-Type ABC monocrystalline Solar Panel with Anodized Aluminum Frame, Find Details and Price about Aiko solar panel double glass solar ...

Aiko Solar, a renowned Chinese manufacturer, has been a leader in solar cell production for years. With a strong focus on research and development, Aiko has introduced its own innovative solar cell technology - the ...

Maximize project profits with 480-490W dual-glass modules. Ultra-low 0.35% annual degradation. Optimized for partial shade and high temperatures. Fast shipping on bulk orders.

With up to 10 %\*\*\* higher output compared to TOPCon modules, measured using an AIKO ABC module as an example, robust double glass and innovative cell architecture, it offers installers, construction ...
