One Albanian telecommunications operator has completed the deployment of 5G networks in the country. The operator, One Albania, has announced that it has successfully completed the deployment of 5G networks in the country. The deployment is part of a larger project to modernize the country's telecommunications infrastructure. The 5G networks will provide faster speeds and lower latency, which will be beneficial for various applications, including streaming, gaming, and industrial automation. The deployment is expected to be completed by the end of the year.

Explore the expert guide on 5G regulation and law in Albania. Discover insights on deployment, spectrum allocation, compliance, and future 6G plans.

Albania has begun deploying 5G, with a focus on non-standalone (NSA) networks that leverage existing 4G infrastructure. SA 5G networks, which operate independently of 4G, are in their initial stages.
