What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

How many solar projects are there?

There are more than 8,200 major solar projects currently in the database, representing over 347 GWdc of capacity. There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. The list shows that there are more than 185 GWdc of major solar projects currently operating.

Where can I find a list of major solar project data?

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

What is a mega solar project?

Industry experts generally consider solar installations exceeding 1,000 MW (1 GW) capacity as mega solar projects. These installations typically feature: Based on the latest 2025 data, here are the world's largest operational solar farms ranked by their installed capacity: 1. Gonghe Talatan Solar Park - China (15,600 MW)

The What and Why of Solar Energy Projects Solar energy projects harness the power of the sun, converting it into electricity or heat for various uses. This technology is pivotal in addressing ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

A lot of progress has been made - a boom in solar and wind energy projects pushed the world past 40% clean energy used in 2024 according to think-tank Ember. Carbon dioxide emissions, ...

All Solar Power Projects

Search latest and upcoming global solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards with our comprehensive online database.

For solar PV, wind and bioenergy for power, deployment has been revised downwards. Solar PV accounts for over 70% of the absolute reduction, mainly from utility-scale projects, while offshore ...

Quick Facts There are more than 8,400 major solar projects currently in the database, representing over 353 GWdc of capacity. There are over 1,400 major energy storage projects currently in the database, ...

The Bipartisan Infrastructure Law (BIL) includes almost \$58 billion for clean energy and power initiatives, encompassing solar energy projects and power grid enhancements. FirmoGraphs ...

All pipeline and constructed solar projects around the world will be presented here with specific site information and project profile, such as rooftop installation, residential, large-scale ...
