-----  
Is Thailand ready for a new electric vehicle policy?

Thailand, long regarded as Southeast Asia's automotive manufacturing powerhouse, is undergoing a historic transformation. In 2025, Thailand's government has rolled out a bold package of new electric vehicle (EV) policies designed to rapidly shift the country away from fossil fuel cars towards sustainable electric mobility.

What is Thailand's EV policy?

The government's updated Thailand Electric Vehicle Policy under the Board of Investment (BOI) EV 3.5 framework (2024-2027) aims to strengthen local manufacturing capacity and attract more foreign investors. Through targeted incentives and strict local production requirements, the policy is setting the foundation for a self-sustaining EV ecosystem.

What are Thailand's 2025 EV policies?

Thailand's 2025 EV policies are more than industrial reforms--they represent a paradigm shift in the country's economic and environmental trajectory. By embracing electrification, Thailand is securing its role in the future of mobility, promising cleaner cities, sustainable growth, and greater economic diversification.

Does Thailand have an EV industry?

Thailand's EV industry is on track for growth as the country strives to become a key regional hub for EV manufacturing. Key trends driving this growth include government policies promoting EV adoption, advancements in battery technology, declining EV ownership costs, and the expansion of supporting services.
