Explore GSL Energy's certified liquid-cooled outdoor lithium-ion battery cabinets, offering up to 372kWh capacity with UL9540, UL1973, and IEC62619 certifications.

With advanced liquid-cooling technology, it ensures optimal battery performance and longevity. The system is equipped with a smart monitoring and control platform that allows for real-time system management and ...

HyperCube is a liquid-cooling outdoor cabinet suitable for energy storage. It features high safety, a long lifespan, high efficiency, stability, scalability, and rapid response.

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital expenditures (CAPEX).

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy storage ...

Liquid-cooled energy storage offers superior temperature control, space efficiency, and longevity compared to air-cooled systems, making it ideal for demanding outdoor applications despite slightly ...

At the same time, our Outdoor liquid-cooled energy storage cabinet is distributed and cluster coordinated through modular design to solve the challenges faced by the energy storage system, ...

Discover how liquid-cooled outdoor energy cabinets enhance green energy solar systems, hybrid power stations, and energy management.

All-in-one design with liquid cooled battery rack pre-installed and a plug and play interface for auxiliary power supply, communication, and DC connection, which can be installed as a single system or ...

Can the liquid-cooled energy storage cabinet be placed outdoors

Engineered for high-capacity commercial and industrial applications, this all-in-one outdoor solution integrates lithium iron phosphate batteries, modular PCS, intelligent EMS/BMS, and ...
