Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value ...

One of the biggest clean energy storage facilities in the world -- the Oneida Energy Storage Project in Ontario -- connected to the grid this month. It's a big clean energy win, but it's ...

A 2022 report titled Energy Storage: A Key Pathway to Net Zero in Canada, commissioned by Energy Storage Canada, identified the need for a minimum of 8 to 12GW of ...

EDWARDSBURGH CARDINAL -- Construction is now underway on the single largest battery storage facility ever procured in Canadian history, supporting the Ontario government's plan ...

ESC's report predicts that Canada's energy storage outlook for 2050 is between 20GW and 40GW, taking into account both short-duration and long-duration energy storage (LDES) ...

Energy storage already ticks every box for national interest: job creation, economic security, emissions reductions, and grid resilience. But so far, it has been left off the priority list. That needs to change.

Total installed capacity of wind, solar and storage in Canada is expected to increase by 32% by 2029 and to double by 2035. There are currently 118 Indigenous-owned wind, solar and energy storage ...

This figure illustrates the geographic distribution and diversity of energy storage projects across Canada, with a noticeable concentration in Alberta, Ontario, and Quebec.

This project aims to develop new models, tools, and datasets to enable a better understanding of a modern power grid with large variable renewable energy resources and increased peak demands ...

Canada adjusts its new energy storage project database

There are an additional 27 projects with regulatory approval proposed to come online by 2030, which--if all were to be built--could further boost Canada's energy storage capacity to 2,768 ...
