Guinea-Bissau has achieved a milestone in its quest for reliable electricity: on 25 April 2025, the small West African nation connected its grid to a regional power network spanning four ...

The Ministry of Energy of Guinea-Bissau, with the support of the ECOWAS Commission through the Regional Off-Grid Access to Electricity Project (ROGEAP), officially launched the mission ...

Energy poverty in Guinea-Bissau is very high. In fact, half of the country, more than a million people, are still unable to access electricity. As of 2023, only 0.8% of the country had access ...

In remote and off-grid regions of Guinea-Bissau, innovative off-grid renewable energy solutions are transforming lives. Off-grid solar home systems (SHS) and mini-grids are providing ...

The government of Guinea-Bissau has recognized renewable energy --particularly solar--as a priority for rural development. Though formal policies are evolving, donor-led programs are accelerating ...

The electricity sub-sector in Guinea-Bissau remains one of the least efficient in West Africa.

Having clean fuels and technologies for cooking -- meaning non-solid fuels such as natural gas, ethanol or even electric technologies -- makes these processes more efficient, saving both time and energy. ...

The aim of this article is to present an energy plan for Guinea-Bissau based on the OMVG transmission network in the country and the integration of a photovoltaic plant at the Bissau ...

In both cases, access to clean cooking solutions is extremely limited, as is the contribution of renewable energy sources penetration (around 2%). The reliability of the electricity network is also problematic ...

The Gambia River Development Organization (OMVG) Interconnection has helped improve access to clean, lower-cost, and more reliable electricity service for more than 2.5 million ...
