Can I lease a commercial property for solar?

You can lease your commercial property for solar and receive the financial and tax benefits of solar. We offer commercial solar leases for your commercial properties, including rooftops and parking lots, plus a storage option. Utility bill credits turn the local electric grid into a solar battery, storing the value of solar energy for later use.

Do commercial solar leases increase property value?

A solar array on a commercial property can increase property value for resale. In many jurisdictions, it also ensures compliance with green building standards, potentially reducing the need for other costly measures.

Is a solar lease necessary?

Installing and owning solar facilities involves a significant upfront capital investment, ongoing costs, and time commitment. With a solar lease from OYA Renewables, you can receive an additional revenue stream from the underutilized space on your property without assuming the responsibility or risk.

How does a commercial solar loan work?

A commercial solar loan is just like any other loan your business might take out. It can be secured by your company's real estate or other assets, or it can be unsecured. Having collateral for a secured loan can often result in more favorable rates from lenders than are available for unsecured loans.

Explore solar leasing for businesses, how it works, and whether renting solar panels is a cost-effective alternative to buying or financing.
