CALL FOR PAPERS work in progress within the rapidly growing fields of DC microgrids. It will bring together researchers, engineers, and students from academia, government, and industry to have an ...

Held during June 12-14, 2026 in Xi'an, China, the conference aims to bring together leading researchers, engineers, and industry professionals to discuss the latest advancements and challenges in the ...

This conference brings together researchers, engineers and students from academia, government and industry for an interactive discussion on the latest advances in DC Grid ...

March 19 - 20, 2025. RE+ Microgrids is a new, microgrid-focused event including DC and hybrid AC/DC microgrids. The program, supported by industry-leading partners EMerge Alliance and the Microgrid ...

The growing adoption of electric vehicles (EVs) and the increasing demand for renewable energy highlight the importance of integrating energy production and consumption within DC-microgrids.

ICDCM is a flagship conference of the IEEE Power Electronics Society (PELS) devoted to the dissemination of new ideas, research and work in progress within the rapidly growing fields of DC ...

From advancements in DC power systems to real-world case studies on microgrid implementation, these sessions and companies will provide expert knowledge for future leaders and industry ...

IEEE International Conference on DC Microgrids (ICDCM) brings together researchers, engineers and students from academia, government and industry for an interactive discussion on the latest ...
