In a groundbreaking move toward sustainable energy solutions, China's Dajin Heavy Industry has launched a massive fishery-solar hybrid farm in Tangshan, Hebei Province, combining a ...

The project, which is now fully connected to the grid, employs a dual-use model of "power generation above, aquaculture below," spanning approximately 353 hectares of fish ponds and ...

The collaboration with Chongho Bridge is anticipated to yield significant environmental and social benefits for rural households, businesses and their wider communities through rooftop ...

Discover Daigas G& P Solution's diverse portfolio of photovoltaic power plants across Japan. Learn about each facility's operational details, capacities, and locations, showcasing our commitment to ...

Situated on the southeastern edge of the Taklamakan Desert, the solar panels, standing over two meters tall, serve a dual purpose. Besides generating power, they act as windbreaks, ...

The fishery-solar farm hybrid could reduce 320,000 tons of CO2 emissions annually thanks to its 370,000 bifacial solar panels.

In a national action plan issued in May this year, the country pledged to accelerate its construction of large wind power and photovoltaic bases in deserts, and will in the meantime ...

Daigas G& P Solution provides a wide range of power generation services, from clean and efficient natural gas to biomass and renewable energy.

An ambitious fishery-solar farm hybrid in China is now fully connected to the grid.

The 1.5 GW Tengger Desert Solar Park, also known as Great Wall of Solar, is the largest solar PV power station in China.
