The Spark network delivery team has been busy adding new coverage to its 5G network over the last 12 months. 20 locations are now 5G live across New Zealand with more to follow over the coming months.

One NZ has announced that they have successfully enabled 17 new cell sites to be completed in May, with 9 new locations in Aotearoa to benefit from 5G technology.

One NZ has officially launched 5G services in Hamilton and Tauranga, bringing the total number of 5G-enabled cities to five across New Zealand. The launch covers key areas including Hamilton CBD, ...

Our 5G and 4G mobile networks provide coverage in 98.5% of the places you work, live and play. Check our coverage maps to see the signal at your location. Your mobile phone will use the fastest network frequency ...

It has been integrated into an existing cockpit that already includes internet performance statistics from all operators in a country, as well as access to speed-test results and coverage data.

In NZ 5G has already been launched by Spark and Vodafone in limited locations, with further rollout planned in the near future. Spark initially trialled 5G wireless in Alexandra, and then extended 5G to parts of Westport, ...

Across NZ in February, One NZ has upgraded or built a total of 16 sites throughout the motu, with 12 of those providing new 5G coverage to areas and a further 4 providing capacity improvement.

# Does New Zealand have 5G base station sites

Cellsites using 5G have to comply with the New Zealand exposure standard. Current 5G sites in New Zealand use frequencies similar to those already used by cellsites.
