Eastern students graduate with strong problem-solving, communication and team-building skills in dozens of career fields. They become doctors, attorneys, accountants, teachers and social workers ...

See Eastern through the eyes of our students! Eastern Connecticut State University is Connecticut's only public liberal arts university --and now, you can experience it like never before through The ...

The battery installation, which received funding from the SOLBAL photovoltaic investment aid programme, managed by IDAE, has a power of 1.1 MW and a storage capacity of 5.5 MWh, making ...

Eastern Connecticut State University engages students from diverse backgrounds in a transformative, liberal arts learning experience that provides knowledge and skills to lead enriching, purposeful lives.

Among these is a project featuring a hybrid energy storage system that combines lithium-ion and vanadium flow batteries, directly linked to a large-scale solar PV farm!

Vanadium is a critical raw material used in electric mobility, defence and space and it enables the transition to renewable energy sources via its use in long duration energy storage (LDES) solutions. ...

Europe's largest vanadium redox flow battery has reached a breakthrough in renewable energy storage.

With 19 varsity teams, Eastern participates in Division III athletics and is a member of the Little East Conference. Our student-athletes have won ten national championships: five in softball and five in ...

Vanadium redox flow batteries (VRFB) are one of the emerging energy storage techniques being developed with the purpose of effectively storing renewable energy.

Eastern Connecticut State University's Landing page for Current Students. Includes links for various online

Eastern Europe Safe Liquid Flow Vanadium Energy Storage Project

resources (email, Blackboard, e-Web, etc), Academic Support offices, important Campus ...

The system uses an aqueous solution of vanadium electrolyte, stored in four 50-cubic-meter tanks, which not only guarantees safety, but also provides high flexibility in capacity management.

How does Eastern support student success? We offer summer bridge opportunities, free tutoring, writing help, first-year programs, faculty advising, and mentoring. You'll have a whole community dedicated ...

Which energy storage projects are incorporating vanadium flow batteries? The CEC selected four energy storage projects incorporating vanadium flow batteries ("VFBs") from North ...

The Fraunhofer Institute for Chemical Technology (ICT) says it has put Europe's largest vanadium redox flow battery into operation. The battery has a power output of 2 MW and a capacity ...

There's something for everyone! All recreational programs are free for Eastern students, faculty and staff. Welcome to the Athletic Complex, the home of the Eastern Warriors! With 19 varsity teams, ...

Oslo's recent deployment of a 120MW all-vanadium liquid flow energy storage system isn't just another pilot project - it's answering questions we've been avoiding since the Paris Agreement.
