15th January 2026, Dublin: Energy Storage Ireland (ESI) has welcomed the Government's Large Energy User Action Plan (LEAP), describing it as a timely and strategic policy that identifies energy storage ...

Together, we work with policymakers, system operators and the wider energy industry to help the development of energy storage on the island of Ireland and facilitate the achievement of our ...

FAQs: Energy storage systems in Ireland What is the battery energy storage system? A battery energy storage system captures electricity from the grid or renewable sources, stores it in ...

ESI has published recommendations for the Programme for Government highlighting the benefits of energy storage to Ireland's energy security, electricity prices and decarbonisation targets.

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the ...

Experts across the sector agreed that energy storage will be crucial for balancing the increasing share of renewable energy on the grid while ...

Energy Storage Ireland (ESI), the industry body representing the energy storage sector in Ireland, has called on the Irish grid operator EirGrid to deliver the Government's target of 500 MW of ...

ESI is partnering with the Energy Storage Summit 2026! The Energy Storage Summit is where decisions get made, ideas sharpen, alliances form, and the next [...]

This is Ireland and Northern Ireland's largest conference focused on the energy storage sector and brings together over 300 experts from across the industry. Energy storage is key to ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity

Energy storage in ireland

storage systems in Ireland's energy transition, identifying the key stakeholders and ...

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

Energy Storage Ireland urges EirGrid to deliver Ireland's 500 MW storage target by 2030, boosting renewable energy, lowering electricity costs, and improving energy security.

These storage assets are needed to minimise renewable dispatch down, support the grid, reduce our reliance on fossil fuels and reduce Ireland's carbon emissions. Ireland's electricity storage ...

Energy Storage Ireland Annual Conference 2026 When 30th June 2026 9:00 am - 5:00 pm

To achieve a decarbonised energy sector a cost-effective means for the long-term storage of large volumes of renewable energy will be required. Technologies such as pumped hydro, compressed air ...

The report explores options for back-up generation and storage most suited to Ireland's requirements, with zero- or low-carbon dispatchable generation seen as particularly crucial for a ...
