A fire broke out at California's Moss Landing Power Plant on Thursday. The plant, said in 2023 to be the world's largest, stores energy for the California grid.

- A California lawmaker is calling for an end to the Morro Bay battery energy project following a fire at a lithium battery storage facility in Moss Landing, operated by Texas-based Vistra ...

PG& E announced last month that it planned to restart the Elkhorn facility by June 1 because, during the summer, "that power is necessary to effectively manage the demands of the ...

The Texas-based Vistra finished its most recent phase of construction on the energy storage facility in 2023 as part of California's efforts to bolster its grid with clean energy.

Both facilities have been offline since Jan. 16, when a Vistra-owned building containing 99,000 LG battery modules caught fire, spewing toxic gases into the air and prompting the ...

China built enough energy storage capacity to power 20 million homes in 2024, yet 6.1% of these systems are essentially taking a permanent nap [1]. The global energy transition's poster ...

A fire at the world's largest battery storage plant in Northern California is smoldering after sending plumes of toxic smoke into the atmosphere.

MOSS LANDING, Calif. -- Hundreds of people were ordered to evacuate and part of Highway 1 in Northern California was closed early Friday after a major fire erupted at one of the ...

Some 1,200 residents were allowed to return home Friday night after they were evacuated a day earlier due to a major fire at the Vistra battery storage plant in Moss Landing.

PG& E is delaying when they will reactivate their battery storage facility in Moss Landing following a fire at
