---

The project is a hybrid system combining hydropower and energy storage. The hydropower plant and storage solution will operate together, enabling participation in flexibility ...

Hitachi Energy signed the agreement with EPC contractor Nordic Electro Power (NEPower), which is building the 2-hour duration BESS for Switzerland-headquartered energy ...

Hitachi Energy has signed a contract with Nordic Electro Power (NEPower) to provide advanced power conversion solutions for Finland's largest battery energy storage system (BESS) in ...

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential role of these ...

The energy storage facility delivered by Merus Power to Lappeenranta, Finland, has been completed and put into market use on 15 May 2025. The energy storage facility is owned by a ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage system ...

By leveraging advanced storage technologies, Finland can enhance grid stability, improve flexibility, and ensure a reliable energy supply--paving the way for a carbon-neutral future.

Construction has officially started on Finland's latest large-scale energy storage project, marking a pivotal moment for renewable energy integration in the Nordics. This initiative aims to stabilize the ...

Thanks to technological advances, developer SENS has been able to increase the capacity of the BESS component of its innovative hybrid pumped hydro-BESS project, located at ...

# Finland hybrid energy storage power station project

The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland. Set to go online in 2026, the facility will enhance grid stability, energy resilience and accelerate green ...
