This course is designed for anyone who would like to learn about solar energy from A to Z for electrical engineers, solar designers, and all who are interested in working in the solar energy field.

This course focuses on grid-direct PV systems, but covers material critical to understanding all types of PV systems. These core concepts are expanded on in SEI's upper &#173;level PV courses.

This course can provide learners with the knowledge and skills needed to design and install solar systems according to project specifications. It covers topics such as site inspection, system layout, ...

Throughout this solar design course, you will delve into mechanical and electrical design principles and learn how to select appropriate equipment, such as solar panels, inverters, mounting structures, and ...

Access a wide range of online courses in solar energy. From beginner to advanced levels, our courses cover all of the necessities.

Enroll in 50Hz Academia's Solar Power Plant Design Course & Engineering Course to learn solar PV system design, plant layout, and performance analysis as per global standards.

The Solar PV Design class is available 100% online and features video presentations, practice questions, PDFs, and useful links to additional online content. Students should complete modules in ...

Learners experiment with calculations needed to design a PV system, exercising newly gained knowledge about site selection, layout, code compliance, system components, and wire sizing. This ...

Are you ready to gain practical skills in designing solar home systems from scratch? This beginner-friendly course is designed to provide a step-by-step foundation in solar home system design, ...
