Does Egypt have 5G?

This allows for the management of traffic lights, air quality monitoring, and improved transport services, in addition to accelerating digital government services. Egypt is working to integrate these technologies in new cities such as the New Administrative Capital and New Alamein. When will 5G coverage reach all provinces?

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

How will 5G impact Egypt?

Telecom and technology experts have confirmed that 5G will enhance Egypt's regional standing in the telecommunications market and open broader horizons for investment in artificial intelligence, the Internet of Things (IoT), and smart cities. It will also provide a strong boost toward achieving the goals of "Digital Egypt Vision 2030."
