Copenhagen Energy has been developing the project since the start of 2024. It will now proceed work with the procurement of long-lead components such as batteries, inverters, and transformers, after which it will choose ...

New green storage battery milestone for Copenhagen Airport. Denmark's air gateway to the world, Copenhagen Airport (CPH), has installed a battery for storing green power.

Copenhagen Airport installs a large battery for green energy storage, marking a significant step towards sustainable operations and the goal of net-zero emissions.

With plans to introduce 1350 new electric vehicle charging stations, Copenhagen Airport prioritizes embracing battery technology for optimal energy utilization.

The battery system will be located in Maglebylille, south of the terminals, near the airport's workshops and garage facilities. Here, there are both connected solar panels and charging stations that can ...

"With the 1350 new charging stations for electric cars that Copenhagen Airport will have in the coming years, it is crucial to embrace battery technology and build experiences with the many possibilities ...

"With the 1350 new charging stations for electric cars that Copenhagen Airport will have in the coming years, it is crucial to embrace battery technology and build experiences with the many possibilities available," says ...

The airport's commitment to incorporating battery technology aligns with its plans to install more than 1,000 electric vehicle charging stations, further emphasizing its dedication to sustainability.
