How much does it cost to lease solar panels?

The average cost to lease solar panels ranges from about \$50-\$250 per month. Leasing is one of the options available to homeowners for financing a solar installation.

Should you buy a solar lease?

Solar leases can be particularly appealing to those who want to use environmentally friendly energy but are unwilling to pay the upfront cost. With a lease, you can enjoy the benefits of a solar system without having to buy solar panels or come up with a large down payment.

Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

How does a solar lease compare to a utility?

Here's how a solar lease compares to paying for electricity through a utility. Solar leases do provide a path to energy savings-- especially if the cost of utility electricity outpaces the escalator. However, buying solar panels has become the better deal in the last decade or so.
