How do you use a solar power generator?

Solar power generator solar panels are smaller and more portable than on-grid solar system panels, so you can move them around later on fairly easily if you need to. Plug your batteries into the charge controller. Connect the positive and negative cables from the batteries to the positive and negative terminals on the charge controller.

How do I set up a solar panel?

Note: When setting up your system, the solar panels should be out of the sun or covered for safety reasons.

Step 1: Hook up the battery to the charge controller. Connect the battery terminal wires to the charge controller FIRST, then connect the solar panel (s) to the charge controller.
