Will a balcony Solar System run my apartment?

At its core, balcony solar ("balcony power plant" or "plug-in solar") refers to a compact photovoltaic system designed for apartments, condos, and urban spaces--making clean energy truly accessible. But let's be honest: a balcony solar system will not run your entire apartment. Balcony solar kits are best thought of as "solar appliances."

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!
