This channel is ALL about bringing you consistent Minecraft content that is short, precise, and to the point!

The Generator switches to transmitting power when a Redstone signal is applied. A daylight sensor and inverter can be used to have the generator generate during the day and output its energy at night.

It produces up to 80 RF per tick depending on the time of the day when exposed to sunlight. It averages around 40 RF/ tick in the Overworld and a constant 40 RF/t in The End. The internal energy buffer is ...

It cannot simultaneously create and transmit RF; a Redstone signal must be applied in order for the Generator to transmit RF. A Daylight Sensor and Inverter can be used to generate RF during the day ...

The Solar Panel is a block added by Extra Utilities 2. It will generate 1 Grid Power (GP) during the day, 0.95 GP if it's raining, and no GP at night, assuming it has access to the sky.

This uses a native Minecraft feature where two Redstone Repeaters next to each other form a multi-block flip-flop. When the latch is unlocked we use the value from the Detect 0 condition ...

Potions Generator: consumes potions, with more complicated potions producing more energy. Solar Generator: produces energy when exposed to sunlight, charges in daytime, generates at night time ...

I'd like to know how you use the extra utilities solar generator, due to the fact it can only charge/transmit power. Any tips needed.

Solar power is a convenient feature but it can be a bit dull when you just place the block and forget about it. In addition the day/night cycle can be manipulated, with sleeping and eternal day ...

To generate RF, take an ender tank that has the same colour code as the one at the pump, and plop it

How to use the extra solar generator in Minecraft

somewhere you want to generate RF with the orange part of the dial pointed up. ...
