---

Nvidia CEO Jensen Huang and SIEPR's John Shoven get ready to take the stage together at the 2024 SIEPR Economic Summit. Having co-founded Nvidia more than 30 years ago, Huang ...

The limit of computing power lies in electricity, including photovoltaics, energy storage and nuclear fusion. Without major progress in the energy field, the development of artificial intelligence will not be ...

Recently, both Huang Renxun, the founder of NVIDIA, and Sam Altman, the CEO of OpenAI, publicly stated that "the endgame of artificial intelligence is energy." This statement has ...

In recent days, Huang Renxun, Sam Altman, and Musk have spoken out: "The end of AI is photovoltaic, energy storage, and power!" As three big shots in the tech industry, their remarks have sparked ...

The low-cost future of the energy-storage market will make for a tough competitive environment--but a rewarding one for players that make big improvements in performance.

Huang Renxun made it clear in his speech: "The end of AI is photovoltaics and energy storage! We can't just think about computing power. If we only think about computers, we need to ...

Jensen Huang's latest comments about photovoltaic energy storage at the 2024 Global Tech Summit might just have revealed Nvidia's next big play. With global energy storage projected to reach \$490 ...

The energy storage competition has stepped into the second half of all - around competition, attracting more attention and fierce battles in the market.

Regarding the threat of power shortage faced by computing power development, Huang Renxun, founder of Nvidia, said in a public speech at the beginning of this year, "The end of AI is ...

# Huang Renxun Photovoltaic and Energy Storage Competition

I believe many people have seen Huang Renxun's interview with the U.S. Congress in the past two days. He expressed his views on the competition between China and the United States ...
