India has already set a national target for energy storage, aiming to meet 4% of its electricity demand by 2030, which translates to approximately 200-250 GWh of grid-scale storage capacity.

Given the anticipated growth in lithium demand in India, it is essential for policy-makers to consider a range of short-term and long-term strategies to secure lithium supply.

The Bidder must have experience of having successfully completed Design, Engineering, Procurement, Testing and Commissioning of Battery Energy Storage System (BESS) for at least 01 (One) Grid ...

A lack of decisive action to secure a lithium supply in the coming decade could leave India behind in the race to develop a Li-ion battery manufacturing base and stymie the development of key industries ...

New demand-driven renewable energy (FDRE) tenders will help reduce India's reliance on coal and other conventional power sources.

India lithium energy storage power supply procurement

The Ministry of Power has granted a one-year waiver from mandatory DPIIT registration for bidders using lithium-ion cell technology in grid-connected battery energy storage system (BESS)...
