-----  
What is new Indonesia technical standard for 5G devices?

This regulation regarding new Indonesia technical standard for 5G devices applies to subscribers and base station devices used for Broadband Wireless Access(BWA). New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks.

What is new Indonesia technical standard for 5G BWA?

New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks. The regulation of the new Indonesia technical standard for 5G BWA is, of course, inseparable from efforts to harmonize with international norms.

What is a 5G subscriber station?

Subscriber Stations (SS): A radio access device on the user side,such as a 5G modem or router. Base Station (BS): Is a network core device that transmits 5G signals to the surrounding area. Before it can be legally used or marketed,the device must meet some established technical requirements. Here are some of the standards that must be met:

Can 5G BWA devices be used indoors?

Usage Limitation: Subscriber stations are limited to indoor use only. In accordance with Ministerial Regulation No. 3 of 2024,all 5G BWA devices must undergo DJID/SDPPI certification using these technical standards as references. Stakeholders including manufacturers,importers,and vendors must ensure compliance through certified testing labs.
