How much does solar installation cost?

Solar installation costs have dropped dramatically over the past decade - from over \$50,000 for a typical home system in 2010 to under \$30,000 today. Yet many homeowners still struggle to understand the true upfront investment required before applying federal tax credits and local incentives.

How much does a 12 kW solar panel cost?

Your state's averages matter more than national numbers, and factors like shading, roof complexity, and local incentive programs all play a role in your final price. The average cost of a 12 kW solar panel installation on EnergySage is \$30,505 before available incentives.

How much do solar panels cost?

The panels themselves are probably the first thing that comes to mind when you think about going solar, but solar panels represent less than a third of the total solar equipment costs. You can expect all required solar equipment, including supply chain costs and sales tax, to cost \$14,055--about 46% of the total system price.

How much does it cost to install solar panels before tax credit?

The average cost to install solar panels before tax credit swings wildly across the country - sometimes by more than \$20,000 for identical systems. Take California and West Virginia, for example. A typical home solar system costs around \$20,000 in California but jumps to \$45,000 in West Virginia. That's not a typo - it's more than double!
