-----

There is a plan to build 10GW of N-type photovoltaic modules, 2GW of photovoltaic cells, and associated facilities on 99 acres of land. The project is divided into two phases. Phase I of the...

DAS Solar has commenced full-scale production at its 10GW high-efficiency module project at the Jingshan Base in Hubei Province, China. This project spans approximately 98.84 acres ...

The base has become the first in Jingshan with an output value over CNY 3 billion, accelerating the integration of related industries, and developing the local RE industry cluster by fostering the mutual ...

It is being built in two phases, with a total investment of 2 billion yuan in phase I covering 49.42 acres. A total of 3.18GW of high-efficiency photovoltaic modules were produced at the end of ...

The DAS Solar Jingshan Base is located in the Jingshan Economic Development Zone. The project covers an area of more than 600 acres and is planned to construct 10GW N-type high ...

The 10GW high-efficiency module project at DAS Solar's Jingshan Base in Hubei Province, China has officially commenced full-scale production.

A 10 GW high-efficiency module factory by DAS Solar at its Jingshan Base has begun full production. More details here.

DAS Solar has announced that the 10GW high-efficiency module project at its Jingshan Base in China's Hubei Province has officially commenced full-scale production.

The second phase of the project, which is commissioned in July 2024, will make the Jingshan plant the largest PV module production base in central China, with an estimated annual output value of more ...
