SunContainer Innovations - Imagine a city where streetlights dim during peak hours while hospitals rely on diesel generators. This isn't fiction - Kathmandu's power demand grew 18% annually since 2020, ...

Nepal is seeking consultants to expand its power system, which includes building more than 200 kilometers of new transmission lines, upgrading existing ones, and constructing solar and solar-wind

"This transformative project will revolutionize industrial energy use by replacing polluting diesel generators with a large-scale, solar-powered battery storage system," said Gham Power.

The results showed that solar and wind could supply up to 97 % of electricity demand with storage ensuring a reliable system. In addition, regional interconnection could reduce storage needs ...

The 146MW Tanahu project isn't your grandpa's pumped storage. Its AI-powered turbines predict rainfall patterns using Himalayan glacier melt data, achieving 89% round-trip efficiency.

Consequently, in this study, we conduct a thorough review of existing literature to provide a comprehensive assessment of the current status of renewable energy and the energy mix in Nepal. ...

Solar, wind, geothermal and green hydrogen investments can complement hydropower and offer long-term stability. Strengthening regional energy trading through bilateral agreements and ...

KATHMANDU: Gham Power, in collaboration with Practical Action and Swanbarton, has been awarded a project by the United Nations Industrial Development Organization ...
