Her operation now manages 500 ewes across nine solar sites, producing local lamb alongside clean energy. From an engineering standpoint, this suitability of sheep to such environments is not an...

In the small farming town of LaSalle, sheep move in for the summer to help manage the landscaping responsibilities on a 5 megawatt solar farm. CBS News Colorado's Dillon Thomas has the story.

Grazing sheep alongside solar operations offers benefits to both the land and animals. The sheep graze on grass and weeds, preventing vegetation from shading the solar panels or inhibiting their ...

Solar shepherds, who manage sheep grazing under solar panels, are part of a growing movement that combines agriculture and renewable energy -- and offers high incomes in the process.

Solar grazing, as a dual land-use, allows the Michigan sheep industry to meet the market demand for lamb, support rural economies, and keep farmland in production all while supporting the ...

Illinois farmers are finding that sheep and solar panels make a surprisingly good team, and as a result, they're asking Americans to bring more sheep to the dinner table. The practice, known as solar ...

It may seem an unlikely mission for clean-energy developers, but in many states, including Illinois, grazing sheep between rows of photovoltaic panels is considered the most efficient form of ...

Sheep are transforming solar panel farms by replacing mowing with lamb-scaping. Discover how this eco-friendly solution benefits renewable energy!

Grazing sheep alongside solar operations offer benefits to both the land and animals. The sheep graze on weeds and grass, preventing vegetation from shading the solar panels or inhibiting their movement ...

On a stretch of land in Virginia, a flock of sheep roam beneath rows of solar panels, happily grazing on the

Lamb Photovoltaic Panel

grass. The sheep aren't there by accident--in fact, they're performing an important job.
