A first-of-its-kind hydrogen- and battery-powered microgrid project is up and running in the remote California town of Calistoga, according to a Sept. 25 announcement by Pacific Gas and...

News stories and press releases related to the Hydrogen and Fuel Cell Technologies Office.

Read here about up to date news in the hydrogen industry including hydrogen cars, hydrogen fueling stations, fuel cells and more.

Will Hydrogen Microgrids Really Go Green and Become the Next Big Thing? Recent microgrid demonstration projects in Scotland, Germany, South Africa and southern California aim to ...

Initial deployments, like the HyTrA system operational in South Africa since 2023, prove that hydrogen microgrids are no longer theoretical. By 2025, Fraunhofer IWU plans to expand these ...

Why microgrids with hydrogen for backup power will create significant benefits for consumers and utilities. The energy grid in the U.S., particularly in regions like California, Texas, and ...

Hydrogen Informs covers the latest news, insights, events and updates on the global hydrogen and fuel cell industry through magazines and online channels.

Pacific Gas and Electric Company (PG& E), a California utility, in collaboration with Energy Vault, has launched a long duration energy storage (LDES) hybrid microgrid that combines hydrogen ...

HNO International has launched HyGrid, an intelligent hydrogen-powered microgrid system engineered to deliver 24/7 zero-carbon electricity, anywhere and everywhere.

Conversely, as autonomous energy networks in a compact format, microgrids bridge periods of low energy

Latest News on Hydrogen Fuel Microgrids

production, known as "dark doldrums," when there is no wind or sunshine. Fuel ...
