The document emphasized the importance of renewable energy and encouraged the development of large-scale wind and solar bases, offshore wind farms, and distributed solar systems. ...

The reform aims to fully integrate wind and solar power generation into the electricity market. The move marks a historic shift in China's new energy pricing mechanism, transitioning from ...

Plans outlined in the report include an expansion of China's offshore wind sector, a key pillar of the country's decarbonisation strategy. The new wind projects will strengthen grid integration and ...

What's more, it encourages the construction of offshore wind power bases, the extension of offshore wind power to deep-water offshore areas, and the development of solar thermal power ...

This policy promotes the full market-based determination of on-grid electricity prices for new energy sources, including ground-mounted and distributed PV projects, as well as onshore and ...

The policy allows market mechanisms to determine the feed-in tariffs for wind and solar power in China. It seeks to make resource allocation more efficient, promote a fair competition, and ...

China highly values the new energy sector, such as wind and solar power, rolling out an array of favorable policies spanning pricing, finance and industry. The supportive measures, ...

China's solar and windfarms would no longer be guaranteed sales at a fixed price linked to coal benchmarks, under a new policy released by the central government. The policy asks local ...

The National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) have issued a notice on promoting the integration of new energy sources like ...
