How does Nissan's AO-solar extender work?

Nissan's new Ao-Solar Extender system powers its best-selling Sakura EV using solar panels, generating up to 3,000 km of annual driving range while reducing reliance on traditional charging stations.

Will Nissan's 'AO-solar extender' come to Japan?

YOKOHAMA, Japan -- Nissan today announced that it will showcase a prototype vehicle equipped with an onboard solar power generation system at this month's Japan Mobility Show 2025. Named the 'Ao-Solar Extender,' the system has been installed on Japan's top-selling EV, the Nissan Sakura 2.

How much solar power can a Nissan re-Nissan solar system generate?

The team developing the system estimates that, on an annual basis, it can generate enough solar electricity to power up to 3,000 km of driving. The concept exemplifies the second pillar of Nissan's Re:Nissan strategy -- a renewed commitment to delivering innovative products and mobility solutions that enhance customer experience.

Why is Nissan integrating solar technology into the Sakura?

Integrating solar technology into the Sakura exemplifies Nissan's commitment to innovative, sustainable mobility solutions that resonate within Japan's highly competitive Kei segment.

Nissan today announced that it will showcase a prototype vehicle equipped with an onboard solar power generation system at this month's Japan Mobility Show 2025.

Nissan introduces the Ao-Solar Extender for the Sakura EV -- a roof-mounted solar system generating up to 3,000 km of range annually, cutting grid reliance and redefining sustainable ...

Mobisun PowerHive 60: mobile power hub with 48 kWh capacity, 60 removable power banks, IP54 certified & STANAG compliant.

Nissan's new Ao-Solar Extender system powers its best-selling Sakura EV using solar panels, generating up to 3,000 km of annual driving range while reducing reliance on traditional ...

Nissan's top-selling Sakura EV gains the Ao-Solar Extender, an extendable solar roof that adds up to 3,000
