-----

In a groundbreaking shift towards sustainable maritime transport, the Blue Marlin debuts as the world's first inland vessel to harness solar power directly for propulsion, setting a new ...

3. It features a versatile recharging system, including high-voltage shore power and battery container swapping, along with a photovoltaic system for solar energy. 4. The vessel is equipped ...

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar-powered inland vessel as part of an ambitious ...

A PV system has gone into operation on a new cargo ship developed by HGK Shipping and Salzgitter AG, supplying power directly to the vessel's propulsion system.

A newly built inland dry goods vessel, Blue Marlin, was named last week in Hamburg, Germany, and became the world's first hybrid solar-power inland shipping vessel, as well as ...

Ship rolling affects the efficiency of onboard photovoltaic (PV) systems by changing the effective solar irradiance received by the panels. As the ship rolls, the light-receiving area of the ...

A cargo ship moving silently through inland waterways, powered by the sun. It may sound like something out of a sci-fi novel, but it's already slicing through German canals -- and setting a ...

With 192 solar panels installed, the Blue Marlin can generate up to 37,500 kilowatt-hours (kWh) of electricity each year. For the first time in inland shipping, this solar energy is not only used ...

As the global shipping industry faces mounting pressure to cut emissions and embrace clean technologies, this revolutionary vessel blends solar energy, advanced battery storage, and ...

So next time you see a massive container ship gliding into port, squint a little harder. Those glinting surfaces

# Photovoltaic container ship

might not just be metal - they could be photovoltaic panels silently turning seawater ...
