What is the handover checklist for MCs certified solar PV?

Outlines everything an installer must complete and provide to the consumer when carrying out an MCS certified solar PV installation. This is the Handover checklist for Solar PV standard page from the MCS Certified website. Visit our website to view details of this standard.

What is a PV system inspection?

Verify correct installation of all components of the PV system. These tests on completion generally consist of a visual inspection to identify defects, unfinished work and non-compliance with contractual and planning requirements; functional tests of all key components required for the system to generate and supply electricity to the grid; a

How does a technical advisor test a solar system?

A technical advisor may witness or conduct their own tests. For smaller solar systems, it may be feasible for the contractor to test down to each individual string. For larger sites, the contractor may test a sample from each type of component. They may also use drone surveys covering the entire system to compl

The following details the minimum documentation that shall be provided following the installation of a grid connected Solar Photovoltaic (PV), Electrical Energy Storage System (EESS) ...
