The Solar Mop Company is an innovative organization that has pioneered the development of waterless cleaning products and coatings for solar panels.

This protective wax coating helps repel dust, debris, and water, ensuring maximum energy absorption from sunlight. Our unique formula is free from alcohol, ammonia, and harmful ...

Protect your solar panels with advanced nano technology! Our self-cleaning nano coating prevents dirt buildup, reduces fogging, and enhances sunlight penetration - boosting efficiency by up to 8%.

In this experimental study, paraffin wax with a 42 °C melting point was utilized as a phase change material (PCM) with a photovoltaic panel for cooling the panel and improving electrical ...

Solar Wash & Wax is specifically designed for solar panels, featuring a water and polymer-based wax formula that provides a protective coating with self-cleaning properties making solar panels more ...

This protective wax coating helps repel dust, debris, and water, ensuring maximum energy absorption from sunlight. Our unique formula is free from alcohol, ammonia, and harmful surfactants, making it ...

Clean and protect your solar panels with Solar Wash & Wax. This formula removes dirt and leaves a wax coating for enhanced efficiency and self-cleaning. We earn a commission if you make a ...

Discover the ultimate cleaning solution for solar panels with our Solar Wash and Wax. This 16oz formula is specifically designed to not only clean but also protect your solar panels, leaving a wax coating ...

This study addresses this issue by developing a highly efficient hybrid phase-change material (PCM) for PV thermal management.
