What is a portable solar power system?

A portable solar power system is a self-contained energy solution that combines solar panels, battery storage, and power conversion technology in a mobile, easy-to-use package.

Which flex solar charger should I buy?

Credit: Sam Schild The FlexSolar 40W is a high-output model that easily unfolds from the size of a large book into six solar panels. This is our top recommendation for those seeking an easy-to-use and set up solar charger with a DC output, capable of putting out 19 watts, for larger portable power stations.

How do you charge a portable power station?

Portable power stations are usually charged via the mains- it's quick and efficient, especially for higher-capacity units. Many also let you charge the device from the car using a 12V cigarette lighter socket - ideal for those living the van life or in the RV. You can recharge some devices using solar panels, too.

Do you need a solar charger if you don't need solar?

If you don't need solar but do need some power, check out these great portable chargers or these larger power stations. Editor's Note: We updated our solar charger review on July 10, 2025, adding the Blavor 10W, FlexSolar E10 Mini, and BigBlue SolarPowa 14 to the testing lineup.
