---

Deploys solar + energy storage on all or most schools in the State. Reduces school operating costs, creating resources for teachers and students. Secures IRA tax credits to fund 30%, 50%, or more of ...

In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy resources. Scalable from single asset control to complex microgrid and utility environments.

This solar plus storage microgrid project is Wisconsin's second net-zero, all-electric school and part of a larger regional decarbonization plan.

This study proposes an optimization strategy for school-centered energy systems, integrating battery storage and surplus energy management to maximize emergency power provision ...

With nearly 50 million students attending over 130,000 K-12 schools, the education sector has an important role to play in our country's transition to clean energy. This report tracks and analyzes the ...

The Solar Toolkit provides resources for schools seeking to install solar at their own educational institution.

Discover how school-based solar power systems reduce costs while creating hands-on STEM learning opportunities for students across all grade levels.

This paper proposed the design of PV systems for a public-school building. These PV schemes proposed in this study are classified into off-grid, on-grid, and hybrid PV systems.

By adding batteries, schools can get more value from their solar by storing and using it, instead of selling it to the grid. Several initiatives are supporting schools in adopting solar and ...

# Power distribution using outdoor photovoltaic energy storage cabinets in schools

The SunSmart E-Shelter Schools program is the first in the nation to outfit emergency shelter schools with solar + storage. More than 114, 10-kW photovoltaic (PV) solar systems are currently installed in ...
