Can a 240V inverter be plugged into a Prado?

The 240v ac OUT in the Prado is probably only a small capacity 12v to 240vac inverter which most likely isn't a FULL SINE WAVE device and so what you plug into it has to be able to accept the "so called" modified sine wave power coming out of that base.

Do you use a 12 volt inverter?

Using the inverter involves a power conversion loss - remember the inverter itself uses power to run, apart from any other consideration. We use a 1 000 W inverter /12 volt system with two 100 AH batteries. (Old ones). I only use inverter when I need 220V AC, otherwise always 12v.

Is a 10.5 V IIRC a good setting for a Prado fridge?

After trial and error we set up ours to the 10.5v preset (iirc) as the prado voltage often drops to 11v during driving and thus the 11.5 and 12 v preset wasn't letting the fridge run to maintain its coolness. I think your setup should be fine, however, I've got a TX model, so there's far less electronics.

Should I use an inverter or a 12 V plug?

Would it be better to rather use the inverter plug than the 12 v plug. If the car is running, little difference. If it is not, then you will be wasting power. An inverter carries a lower efficiency rating, so you lose around 15-20% by converting to AC. Canon 5DMkIV with L-goodies.

Find many great new & used options and get the best deals for Genuine Toyota 12v to 220v Inverter Adapter 100w Output HILUX FORTUNER Prado at the best online prices at eBay Australia!

The 240v ac OUT in the Prado is probably only a small capacity 12v to 240vac inverter which most likely isn't a FULL SINE WAVE device and so what you plug into it has to be able to ...

Hi all, I've put together this 12V dual battery system for my 2012 Prado KDJ150R, mainly for camping and fridge use. The setup includes: 40A DC-DC charger 110Ah AGM under bonnet + ...
