Feature highlights: High-capacity 314Ah LiFePO₄ prismatic battery cell with a real capacity of up to 330Ah, designed for solar energy storage systems and high voltage applications.

The CATL 314Ah LiFePO₄ battery cell is commonly used in energy storage ...

Compact Design: High energy density (160Wh/kg) with lightweight construction for space-saving applications. Low Self-Discharge: Retains 80% charge after 12 months of storage, reducing maintenance needs. ...

Power your large-scale energy projects with CALB L173F314A 3.2V 314Ah LiFePO₄ prismatic batteries. These Grade A, brand-new cells are engineered for unmatched longevity (10,000+ cycles) and are perfect for solar ...

The EVE MB31 3.2V 314Ah LiFePO₄ battery cell stands out as a reliable and efficient energy storage solution, catering to a wide range of applications from renewable energy systems to electric mobility.

The CATL 314Ah LiFePO₄ battery cell is commonly used in energy storage systems for residential, commercial, and industrial applications. It can be used in conjunction with other battery cells to create larger ...

Our LiFePO₄ battery has a great 314Ah capacity with a very low ...

Our LiFePO₄ battery has a great 314Ah capacity with a very low self-discharge rate and capacity loss, which has 40% more powerful than the same capacity completed battery pack. With efficient charging and easy ...

Price of European-style solar cells with a capacity of 314Ah for communication base stations

Buy 314Ah CATL LiFePO4 lithium battery for solar home storage. 3.2V ESS-grade prismatic cell with M6 studs. Fast US shipping!

Lithium Iron Phosphate 3.2 volt cells for off grid solar, power bank, EV Bus, and other applications where you need heavy duty power capacity. Assemble together 16 units for a 48 Volt DC off grid battery bank.

The EVE 314Ah cell is ideal for custom battery assembly, offering safe, stable, and high-capacity performance trusted by professionals and DIY enthusiasts worldwide.

CALB battery are a type of advanced lithium-ion batteries that offer several distinct advantages over other types of rechargeable cells. One advantage is their high energy density, meaning they can store more power per ...
