This study examines the creation of a hybrid microgrid to meet the electrical load requirements of the King Saud University campus in Riyadh by utilizing the site's solar and wind potential. A software ...

This paper attempts to capture the design and implementation processes prescribed for a campus based smart microgrid in an industrial site in Jeddah, Saudi Arabia. The basic drivers behind R& D ...

KAPSARC study explores off-grid EV charging stations in Riyadh using GIS technology, proposing microgrid systems powered by renewables to reduce grid load and emissions.

article pdf uploaded.

In this paper, microgrid design and power management are investigated for two configurations, PV/biomass and PV/wind/diesel/battery, to feed an isolated area in the Yanbu region of Saudi Arabia.

Based on the literature review mentioned above, this article considers the first study that investigates energy conservation measures in a small microgrid in a healthcare facility, which is an actual hospital ...

To address these financial concerns, it is necessary to explore the ideal configuration of micro-grids based on the quantity, quality, and availability of sustainable energy sources used to install the ...
