The project involves the development of a new, large format 3D printer capable of producing sand molds for casting the highly complex metal parts of different shapes and sizes that ...

GE (NYSE: GE), Fraunhofer IGCV and voxeljet AG (NASDAQ: VJET) today announced a research partnership to develop the world's largest 3D printer for offshore wind applications in order ...

Sogemi Engineering started up, at the end of 2015, one thermal regeneration sand plant Simplex 5000 at the Iron foundry Eisengießerei Torgelow,, one of ...

The use of printed sand mould technology has enabled Maycast-Nokes Precision Engineering Ltd, a UK foundry, to produce "ready to use" prototype parts in weeks, instead of months, providing a cost ...

Wind turbine castings are produced from aluminium (aluminum), brass and other engineered alloys to ensure low weight, corrosion resistance and longevity. Precision wind turbine castings are used in ...

Torgelow GmbH is an iron foundry in a town of that same name, in Northern Germany. While the operations there can be traced back more than 250 years, the current organization has a ...

Foundry Custom Gray Iron Sand Casting For Wind Turbine, Find Complete Details about Foundry Custom Gray Iron Sand Casting For Wind Turbine,Sandguss from Casting Supplier or Manufacturer ...

In September 2021, GE Vernova (formerly GE Renewable Energy), Fraunhofer IGCV, and voxeljet announced the launch of a joint research project to develop a large-format 3D sand ...

Learn how VX9000 3D printed sand molds enhance manufacturing for wind and hydro turbines, demonstrating breakthroughs in additive technology.

Sand foundry foundry wind turbine generator

Earlier, in 2021, a partnership of GE Renewable Energy and voxeljet sought to develop "the world's largest binder-jet printer for sand molds," to streamline production of castings for the nacelles of ...
