As per the title at some point over the last week the historic data for PV generation that is usually displayed for monthly/yearly totals has disappeared- the option to filter in/out that data is also ...

Solar energy will continue to power your home and charge your Powerwall at night. Each Powerwall installation includes a complete energy monitoring solution for your home.

In addition switching to another tab can cause the "freeze" of the app. However, the data is still displayed in Sunny Portal powered by ennexOS and via the user interface of the inverter.

The issue may be intentional or a bug, as the app does not display data on the production of solar energy. Clearing the Tesla Solar App cache or uninstalling and reinstalling the app can help ...

The Tesla app used to show "home usage" in blue (or was it energy to/from the grid?) but that appears to have disappeared. Is that intentional or does that mean something is wrong with my system?

When the production went up, so did the house use.... and none of my historical energy production displays... Today, I noticed it no longer even shows the grid power and home usage, just ...

Latest app update suddenly broke my ability to see any data on usage and generation from my panels. Don't have a power wall, just panels and the gateway Tesla provided.

Locate your solar panels or PV plant and start forecasting the power & generation. Live current power. Enter your design parameters and follow the current power of your PV System, daily,...

Communication with SolarEdge servers allows you to monitor your system, production data, battery, and smart devices if available, all through the mySolarEdge app.

Solar Photovoltaic Power Generation APP is no longer available

This frustrating issue has led many Tesla Solar users to find an alternative to using the Tesla Solar app. Monitoring systems purchased from outside manufacturers seem to solve most of the usage data ...
