One goal of this 3500 mile cross country north to south journey is to use only solar energy to power the electric assist on a recumbent trike I'll be riding. The solar assist will be used sparingly to help get up ...

A practical guide explores off-grid solar charging for e-bikes, covering energy needs, panel yield, and safety. Understand if solar works for your multi-day tour.

One of several events in the first annual Atlanta Cycling Festival, SACE's Bike for Solar, also known as Tour de Soleil, took cyclists 7 miles through urban Atlanta neighborhoods to see 4 ...

Using a solar charger is the best way to keep your electronics charged on a bike tour. There are different types of solar panels on the market; foldable solar panels, rollable solar panels, power-bank ...

I'm John Patterson, and my goal is to complete my Sunride electric bike tour to all 50 states. I'll be riding one of my two solar-powered electric bikes in each state to promote solar energy and electric ...

With several days of non-stop rain, there's been no way to charge his gear--but today, the sun is finally out! ? Now, the goal is to cover some ground while using his portable solar ...

I'm actually not very experienced in solar panels myself but hear and read a lot from people travelling around the world. This is an excerpt from The Ultimate Power Resource for Bicycle ...

Discover how solar cycling tracks are reshaping eco-friendly transportation with solar power, solar panels, and renewable energy.

I recently had the privilege of interviewing Sushil Reddy and Luis Fourzan along their ~7,000-mile solar electric bike tour around the US. Sushi and Luis were riding through Tucson, ...

Our project is to design and build a solar-electric recumbent touring bike which will allow two riders to ride in

Solar Power Cycling Tour

long-distance tours powered only by the sun and our muscles.
