-----

Photovoltaic (PV) technologies dominate China's solar industry, with roughly 99% of China's solar power capacity. Chinese PV manufacturing accounts for the vast majority of global PV production.

The solar plant is connected to the world's first ultra-high voltage power line which gets all of its power from renewable energy and is capable of transferring power over 1000 km.

We have a broad product line dedicated to providing comprehensive solutions for intelligent energy management for home, industrial and commercial users, as well as ground-based power plants.

Solar growth has sparked debate over farmland use and human rights in Xinjiang. China leads the world in solar panel production and controls 80% of the supply chain.

The project combines solar energy production with agriculture, using the space beneath the panels to grow grass for livestock, supporting the local economy.
