What is a solar powered LED street lighting system?

HeiSolar's solar-powered Led street lighting systems are an efficient means to provide lighting without the need for utility power. Every Stand-alone off-grid lighting system provides cost savings by eliminating the need to trench standard electric wires for installation and providing no electric bill for the lifespan of the lighting system.

What is a solar rotatable street lamp?

Solar rotatable powered street lights equipped with an adjustable slip fitter to the solar panel to ensure the maximum efficiency of solar energy, ideal for high latitudes and areas with insufficient sunlight. Integrated solar street lamp is suitable for solar lighting in low latitudes (0° to 25°; north and south latitudes).

Who makes solar streetlights?

At Panasonic, we bring you cutting-edge solar street lighting solutions designed for a brighter, more sustainable tomorrow. Our range includes All-in-One, Standalone, and DC Solar Streetlights, offering the perfect blend of advanced technology and reliable performance.

What are ISSL streetlights?

iSSL streetlights are equipped with horizontal solar panels, perfectly suited for tropical and intertropical regions. In these areas, this orientation maximizes solar energy capture without requiring specific tilt adjustments. A simple and robust solar solution, designed to meet a wide range of lighting needs. Why choose iSSL range ?
