At SolarBox, we design and manufacture advanced solar containers that bring clean, reliable, and mobile energy wherever it's needed. Built for multi-industry use, our systems replace ...

Explore solar container homes trends in Europe: energy-efficient designs, smart communities, and EU sustainability goals.

With its current energy output, SolarCont can supply 32 German houses' electrical needs, and in more sun-filled places such as southern Europe, it may be able to produce much more.

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ...

Our plug & play product is a unique and highly flexible pre-packaged solar container facility. It effectively includes the entire set of required components in standard shipping containers - 6ft, 10ft, 20ft or 40ft, ...

Sun2Fold offers an ideal solution for flexible and self-sufficient power generation from green energy resources for a variety of different purposes. After an easy and efficient installation, the system can ...

The Mobile Power System has a wide range of applications: from off-grid energy for camps, refugee camps, radar and radio stations to first aid during disaster relief operations and temporary power ...

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly ...

Thanks to the latest version of our container-based e-SPRINGBOX solar generator, you can deploy and start up a clean and silent solar power plant without any structural engineering or specialist handling.

Solar container outdoor power made in Southern Europe

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, ...
